

Composting Program FAQs

- **What is included with your service?**

Emerald City Cocktails provides a compost bin lined with compostable bags, as well as compostable straws, garnish picks, beverage napkins, and high-quality compostable cups. If the venue does not have facilities on-site, then the bartenders will take the contents with them afterwards for disposal.

- **Can I provide my own plastic cups and straws to use?**

No. We will no longer work with single-use plastics of any kind.

- **Can I provide bottled water for my guests?**

No, but don't worry! We provide as many 5-gallon water dispensers as needed, along with compostable cups, for your guests, and we will keep them filled during service. This eliminates waste, saves you piles of money, and ensures that guests have water throughout.

- **What if the venue does not have potable drinking water?**

No worries! We will work with you during the planning process to make sure there is enough water provided. We recommend purchasing the large 5-gallon reusable containers, available at most grocery stores, or using a delivery service.

- **My caterer uses compostable items, will you dispose of those?**

Yes, for an additional charge.
